### 2. About

Koduru Pallavi is a Lecturer in the Department of Anaesthesia and Operation Theatre Technology (AOTT) in MRUH, with a strong academic background in anaesthesia technology and perioperative care. The focus includes undergraduate education with emphasis on clinical skill development, safe anaesthesia practices, operation theatre management, and patient safety. Actively involved in student mentoring and skills-based training, Pallavi integrates simulation-based learning and emerging educational technologies to enhance practical exposure and competency development. Research interests include simulation in healthcare education, application of virtual and augmented reality in anaesthesia training, patient safety initiatives, and innovations in clinical teaching methodologies. The overall academic approach reflects a commitment to quality education, evidence-based practice, and continuous professional development in anaesthesia and operation theatre sciences.
